HOD'S MESSAGE

Information Technology has totally changed the quality of life today, with innovative research and development projects impacting everyday life. The scale of the achievement comes from the ability to integrate computer technology with communication technology. Since information essentially shapes an organization, the student learns the effects of managing this information, both theoretically and practically.

The teaching-learning approach coupled with practical experience gained during Industrial Training in reputed organizations, equips our students to handle the challenges posed by the software industry. Our students are given a strong foundation in information technology and problem-solving techniques, and are made adaptable to changes. This is the single most important attribute of the education offered here.

Our IT department employs modern teaching aids and methodologies helping the students to keep abreast of the latest trends worldwide with updated infrastructure in tune with emerging technologies and future requirements. Most of our alumni found employment in highly reputed companies in India and a significant number of students have gone for higher studies in India and abroad. Our department has remained true to the vision on which it was founded.

VISION

Transforming students compatible for IT profession.

MISSION

M1: Effective implementation of teaching learning process in classroom and laboratories as per MSBTE curriculum.

M2: To provide competent engineers to serve industry and society for IT services like web programming, mobile application development, Network and database design / administration.

M3: To develop IT engineers with social ethics and IT skills for solving real-world problems.
